THERE YEARS' WORK

Our work has been in operation less than three
years during which time 250 children have been
cared for, about 140 of whom have been placed in
homes, leaving about 110 in the school,
for whom homes' are constantly being
found and it is anticipated that the
expective of the school will not for many
are steed to exceed 1.0 or 200 at the outside. It
is believed that having begun in the early history
of our state before the number of dependent
children has boome large, the expense of earling
for them will be reduced to a minimum, and the
highest results for the benefit of the children and
the reduction of our dependent classes will be
reached. We believe the work as begun here in
sures the solution of the question, which in older
and more populous states last become one of great
difficulty
I was my duty to personally visit 1800 children
whose care the training of these other can be
excepted and the results of this experience
were thoroughly convincing that the beneficent
effects realized fully justiff the carnett efforts,
the time and cost that are being out into this
work, and that the near future will repay a thou

Protection white they are depitted of the A week ago the minufacturers who are demanding free wool held a convention in Boston Ao'ce h I been given of the convention long in advince and many newspapers pent representatives to Boston to report the proceedings. But these manufacturers who ant to gave to farmers free trade while they keep protection for themselves re-solved to exclud all resorters and held their convention in sever At the last moment they seem to be seededed that the best has to encourage and promote the Australian wood industry would be to withhold their platform from the American wood growers for the present, and this perhaps was the most judicious thing they did

If reflection is to be maintained as the police of the United States, it must be main tained as an ent ro sy tem. It must be fair in its terms and just in its results. Gover nor Ames and other manufacturers of New England recently put forth a demand for free raw from To this demand Mr Swans, secretary of the American Iron and bicel Association an swors Reduce the duly on pig from and down will specified the swant of the American Iron and defect the swant of the come the duties on everything made from it. If we are ever to have free trade in this country we will have plenty of it, and Now Bog! nd wet get its full share?

The argument against protection has all ways been that I makes manufacturers rich The colossal fortunes of our great manufacturers. turers have always been pointed at as an argument against the system. But now we are ed that the manufacturer must have his raw mater is free of duty so that he may make still more noney. That is he must keep the protection he h is and get n fur her advantage by depriving the pro-ducer of materials of his share of protection This was the po key proclaimed by the den-ocratic party in the Circland campaign of 1888. It is not likely to grow into populari ty with our agricultural classes and the producers of materials generally and the number of votes these people can muster will be a perpetual astonishment to the class of self h manufacturers who want protection for them eves but would denvit to others This text is one not to be forgotten "If we are ever to have free trade in this country we will have plenty of it, and New England will get its full share

## 4 WORD TO WASHINGTON REPUL LICANS

The republicars of Washington have it in their power to elect their state ticket easily and to carry a majority in the legislature They will certain ly do both, if they will only keep the main issues of the campaign di rectly in view and not allow them to be subordinated to collateral things

But there is a real danger that the demo-

erats may win the legislature. Upon this point they are concentrating all their entrgies To this end they will sucrifice their state icket, trade on the capi al quartion and supploy every ruse within their power The republican state ticket will certainly

be elected Let the republicans not allow themselves to be traded out of the legisla-ture. They should let the constitution the state capital, the supreme court and the state tacket gone ally go on ineir own mer its, and see to it that the vote of the party is it is just here that the highest party issue of the campaign is presented

the eampaign is presented

The work of o gamzing the state ought to
be under republican control. This work will
be largely in the hands of the legislature,
and so if the republicans should lose the leglalature, even if they elect their state ticket. they would have nothing of importance Again, the United States scients is no closely balanced that republicane of Washington are not justified in laking chances of allowing election of de nocrats from their state Republicans of Washington therefore

Republicans of Washington therefore should be persistent and stematast in their sudcavor to carry the legislature. To make this sure it is necessary that they should not be turned astes from their purpose to vote the sure of the sure

for the republican legislature candidates.
The Observing hopes therefore that the republican electors of Washington will allow it to exhort them to look to the legislature. Here is the key to the political contest in the

### AS TO 'DEFAMATION"

"The defamation of dead men is the strongest characteristic of the Unescontay'
This the remark of a democratic paper of
Southern Oregon The same paper goes on
to say that The Operophy's poured forth
a torrent of vindictiveness against Sunset' Cox Torrent of vindictiven as " is good

Is it defamation of a man o set forth the indisputable lacks of his public history? The Oskooniax gave sone account of the public career of Mr Cox during the great struggle between freedom and Union on one side and s avery and distanton on the on one side and s avery and distant on the other. It recalled the unquestioned and un quasuonable fact that Mr. Gox. during the whole struggle spoke and voted against treedon and streve in all possible ways to meet and enpourage those who were striving for distinct in the interest of slavery. He was one of shore who wished to perpetuate the injurity of buman slavery and who therefore was in sympathy with the slave holders' rebellion. This, as we have heretofore said, was not mere antagenism to the policy of an opporing party II was tressen to freedom, to be manity and to civiliza-

Men who made, that record have no right to claim the imm inity of silence for it if there is "defamal on" in that record, they are the authors of the record and therefore of the defamation. It is a function of history to point a moral from its own records, it is necessary for the formation and main tenance of a correct public opin on on the great principles that underlie government that acts and ussons of history should often befreakled. There was a class of men to public life in our country during the great struggle that included the civil war, who committed a small or common offense against freedom and humanity, and the cause of freedom and humanity has a right cause of recoom and numerity has a right to profit from the athorizence of wrong which recital of so grave an offense will naturally produce. The record of wrong is one of the bertages of the ages for the promotion of right.

Bishop Clinton, of Alabama, an intelli gent negro minister who was in Portland a few days ago, said that the few Northern men who settled in the South were of no as elstance to the negro, that the least show of interest in the black man's welfare would ambject the white settler to complete ostra subject the white settler to complete cetra sism and that faw, if any, proved strong amough to reast the pressure. In his opin long to the negro from the settlement of Northern whites unless they came in large numbers, and sufficiently strong to withstand the social marstyrdem which by standing up for the rights of the negro, they would be forced to endure.

There is no doubt much of truth in the as-

sertions of the behop. The future salva-tion of the negro race will not be worked out by ether the recognizations a home tatural to thom or ly the influx of those in sympathy with their fite future of the negro hearn a with miss. This is strong protection doctrine. But it is born of the entergine, of the hour. The vote in Montana List November showed that the people were determined supporters of the doctrine of protection. The democratic party, starding on Cleveland's policy and the St. Louis platform, got a transmitted on the strong of the strong mendous defort in Montana. # THE BEST BAKING POWDER.

# REPORTS BY THE GOVERNMENT CHEMISTS:

Dr. Edward C. Love, Analytical Chemist for the Covernment, made some valuable experiments as to the comparative strength of baking powders. These tests were to determine what brands possessed the highest leavening power, and were most economical for domestic use. Dr. Love's Report gives the following:

*In his report, the Gov	ernment Chemist says:

"I regard all aum powders as very unwholesome. Phosphate and Tartaric Acid powders liberate their gas too freely in process of baking, or under varying climatic

changes suffer deterioration."

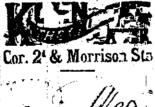

Dr. H. A. Mott, the former Government Chemist, after a careful and elaborate examination of the various Baking Powders of commerce, reported that the Royal was undoubtedly the purest and most reliable Baking Powder offered to the public.

Boulauger a Power Ras Undoubtedly Wined Since Last Januage.

London, Spyl. 22.—The Paris correspondent of the Daily News comments on the seriousness of the voting in France. He timbs there has been a greatereint we falling in the rower of the Boulauges party since Januages. He products that both Boulauger and super the products that both Boulauger and super this four fifths of the re-balless are likely to result in favor of the republicans. All the correspondents of the London newspapers dwell upon the gravity displayed by the electors. The government has left, it to the the mayor's discretion to declare null and vote all the second many condenses and the boulaugests. The ballots of the reactionists and Boulaugists combined will be far-from having the strength they are expected to.
